RESEARCH EXPERIENCE

Independent Investment Research

2025–Present

- Produced 15+ structured investment research reports (10–80 pages) supported by Excel-based valuation and allocation models for intrinsic value estimation and conviction scoring
- Performed bottom-up financial statement analysis across multi-year operating histories, evaluating ROCE, free cash flow generation, leverage trends, and earnings durability
- Built DCF and relative valuation models incorporating sensitivity analysis across growth, margin, and cost-of-capital assumptions
- Developed conviction-weighted position sizing framework integrating intrinsic value estimates, risk-adjusted return thresholds, concentration limits, and alpha-efficiency trade-offs relative to diversification
- Designed quantitative screening filters to identify mispriced businesses meeting predefined quality, profitability, and balance-sheet criteria
- Established predefined risk controls including maximum position sizing thresholds, liquidity filters, and volatility-aware allocation adjustments
- Performed downside scenario analysis and stress testing to evaluate resilience under earnings contraction and liquidity tightening environments
- Conducted post-mortem analyses to refine risk calibration and capital preservation under drawdown scenarios
- Built forward-looking 2026 equity outlook framework linking earnings durability, liquidity conditions, and valuation dispersion to sector allocation positioning
- Authored analytical case studies on systemic risk, leverage cycles, liquidity mismatches, and institutional capital durability within banking and financial systems
- Documented investment theses and decision rationales to enforce behavioral discipline and reduce cognitive bias in capital deployment
- Applied research frameworks to personal portfolio allocation and capital deployment decisions

TECHNICAL SKILLS

Financial & Equity Research: Fundamental Analysis, Bottom-Up Selection, Financial Statement Analysis, Valuation (DCF, Comps), Business Moat Assessment

Quantitative & Risk: Portfolio Optimization, Position Sizing, Risk-Adjusted Metrics (Sharpe, Information, Sortino), Volatility Targeting, Drawdown Control, Attribution Analysis

Technical Tools: Advanced Excel (Financial Modeling, VBA, Macros), Data Visualization, Quantitative Screening

Markets: Indian Equity Markets (Small/Mid Cap), Benchmark Construction, Sector Analysis, Capital Markets

CERTIFICATIONS

SEBI Investor Awareness Test (Nov 2025); Goldman Sachs Risk Management; Fidelity Investment Management; Citi Wealth Management; NY Jobs CEO Council Financial Analyst; Tata Data Visualisation

EDUCATION

NMIMS - MPSTME | MBA Tech in Data Science & Finance

Jul 2025 – Jul 2030 (Expected)
