EXPERIENCE

Helios Capital Asset Management (India) Pvt. Ltd. May 2026 – Jul 2026
Research Intern Mumbai, India

- Contributed to a scalable NAV/AUM data collection pipeline spanning four leading AMCs (HDFC, ICICI Prudential, Nippon India, Aditya Birla Sun Life Mutual Fund), enabling consistent daily data capture for downstream quantitative analysis
- Assisted in implementing a net flow estimation methodology using NAV-return based calculations to isolate subscription and redemption activity from market-driven AUM movement at the scheme level
- Supported fund-house level data mapping and aggregation, consolidating scheme-level records into AMC-level views used for market-share and flow analysis
- Contributed to the development of time-series forecasting models for AUM and market-share projections, applying statistical smoothing techniques under senior researcher guidance
- Assisted in building an internal analytics dashboard to visualize AUM, fund flow, and market-share trends for use by the research team

RESEARCH & PUBLICATIONS

Formal Publication

A Comparative Study of Traditional and Modern Approaches to Portfolio Construction and Performance Evaluation — SSRN, Apr 2026 (31 pp.)

- Compared equal-weighted vs. Markowitz mean-variance optimized portfolios across nine large-cap Indian equities (2019–2026); optimized portfolio achieved Sharpe of 0.409 vs. 0.335 and ∼500 bps outperformance
- Evaluated using Sharpe, Treynor, Jensen's Alpha, and beta; established empirical support for MPT in Indian markets under no-short-selling constraints

Independent Research — portfolio theory, macroeconomics, and institutional finance

Selected titles: *Conviction Concentration Framework*; *The Case Against Diversification*; *An Appraisal of the Union Budget 2026–27*

Equity Research Reports

- *Vodafone Idea* (Telecom, Mid Cap)
- *Kriti Nutrients* (Agro, Small Cap)

PROJECTS

Portfolio Tracking & Analytics System Apr 2025 – Present

- Built Excel decision support system for live NAV tracking, daily P&L attribution, benchmark-relative performance, and risk metrics (realized volatility, rolling Sharpe, beta, max drawdown); integrated Brinson-Fachler attribution decomposing returns into allocation, selection, and timing effects

Portfolio Allocation & Risk Management Engine Nov 2025 – Present

- Designed constraint-aware position sizing model with multi-factor conviction scoring (ROE, ROCE, FCF yield, P/E, P/B, EV/EBITDA); built tiered allocation engine (high 12–15%, medium 8–12%, low 5–8%) with automated overweight/underweight detection

TECHNICAL SKILLS

Financial & Equity Research: Fundamental Analysis, Bottom-Up Stock Selection, Financial Statement Analysis, Valuation (DCF, Comps, EV/EBITDA), Investment Memo Writing

Quantitative & Risk: Portfolio Optimization (Markowitz Mean-Variance), Efficient Frontier Construction, Risk-Adjusted Metrics (Sharpe, Treynor, Jensen's Alpha, Sortino), Brinson-Fachler Attribution

Data & Pipeline Engineering: Model-Ready Data Pipelines, Time-Series Forecasting, Data Cleaning & Structuring, Python (pandas, NumPy, matplotlib)

Technical Tools: Advanced Excel (Financial Modeling, VBA, Macros), Data Visualization

Markets: Indian Equity Markets (Large/Small/Mid Cap), AMC & Asset Management Industry, Sector Research

EDUCATION

NMIMS – MPSTME | MBA Tech in Data Science & Management Jul 2025 – Jul 2030 (Expected)
