EXPERIENCE

Helios Capital Asset Management (India) Pvt. Ltd. <i>Research Intern</i>	May 2026 – Jul 2026 Mumbai, India
- Contributed to a scalable NAV/AUM data collection pipeline spanning four leading AMCs (HDFC, ICICI Prudential, Nippon India, Aditya Birla Sun Life Mutual Fund), enabling consistent daily data capture for downstream quantitative analysis - Assisted in implementing a net flow estimation methodology using NAV-return based calculations to isolate subscription and redemption activity from market-driven AUM movement at the scheme level - Supported fund-house level data mapping and aggregation, consolidating scheme-level records into AMC-level views used for market-share and flow analysis - Contributed to the development of time-series forecasting models for AUM and market-share projections, applying statistical smoothing techniques under senior researcher guidance - Assisted in building an internal analytics dashboard to visualize AUM, fund flow, and market-share trends for use by the research team	

RESEARCH & PUBLICATIONS

Formal Publication

A Comparative Study of Traditional and Modern Approaches to Portfolio Construction and Performance Evaluation — SSRN, Apr 2026 (31 pp.)

- Compared equal-weighted vs. Markowitz mean-variance optimized portfolios across nine large-cap Indian equities (2019–2026); optimized portfolio achieved Sharpe of 0.409 vs. 0.335 and ~500 bps outperformance
- Evaluated using Sharpe, Treynor, Jensen’s Alpha, and beta; established empirical support for MPT in Indian markets under no-short-selling constraints

Independent Research — portfolio theory, macroeconomics, and institutional finance

Selected titles: *Conviction Concentration Framework*; *The Case Against Diversification*; *An Appraisal of the Union Budget 2026–27*

Equity Research Reports

- Vodafone Idea* (Telecom, Mid Cap)
- Kriti Nutrients* (Agro, Small Cap)

PROJECTS

Portfolio Construction and Performance Evaluation	Mar 2026
Built the full quantitative pipeline behind the SSRN publication above: an 8-notebook Python system (data aggregation → returns → SLSQP portfolio optimization → efficient frontier → performance metrics) with a 20,000-portfolio Monte Carlo simulation and 80-point exact frontier trace	
AMC Analytics Platform (amc-dashboard)	Jun 2026
Engineered a 12-stage production pipeline consolidating AMFI’s fragmented AUM, NAV, TER, and fund-master disclosures into a single SQLite warehouse (51 AMCs, 14,214 schemes); built Playwright-based scrapers, market-share/ranking/revenue modules, a 3-year base/bull/bear forecasting engine, and a PySide6 GUI orchestrator	

TECHNICAL SKILLS

Financial & Equity Research: Fundamental Analysis, Valuation (DCF, Comps, EV/EBITDA), Financial Statement Analysis, Investment Memo Writing

Quantitative & Risk: Portfolio Optimization, Efficient Frontier Construction, Risk-Adjusted Metrics

Data & Engineering: Data Pipelines, Time-Series Forecasting, Python (pandas, NumPy, matplotlib), SQL

Tools & Markets: Advanced Excel (Modeling, VBA), Data Visualization, Indian Equity Markets, AMC/Asset Management Industry

EDUCATION

NMIMS – MPSTME MBA Tech in Data Science & Management	Jul 2025 – Jul 2030 (Expected)
